

ELITECLUB

PROJECT IMPLEMENTATION OVERVIEW

1. CINEMATIC FRONTEND & 3D EXPERIENCE

- **Interactive 3D Bottle:** Custom 3D bottle model implemented using React Three Fiber with scroll-driven animations.
- **Sequence Animation:** Three-stage scroll sequence: Roll (Hero), Membership Reveal (Middle), and Final CTA.
- **Glassmorphism UI:** Premium transparent card effects with frosted glass blurring and golden borders.
- **Responsive Design:** Fully fluid layout optimized for luxury viewing on Mobile, Tablet, and Desktop.

2. MEMBERSHIP & AUTH SYSTEM

- **Tiered Access:** Role-based authentication for Admins, Hotels, and Elite Members.
- **Digital Cards:** Dynamic membership cards with real-time status, expiry, and encrypted QR data.
- **Member Portal:** Private dashboard for users to view their benefits and physical card status.

3. ADMIN & OPERATIONS SUITE

- **Member Management:** Full CRUD operations for members with status toggle (Active/Pending).
- **Hotel Network:** Management system for partner hotels with individual login credentials.
- **Card Infrastructure:** Pre-generation system for 1111 physical cards with unique ID assignment.
- **Live Analytics:** Real-time tracking of card scans and member engagement.

4. HOTEL SCANNING SYSTEM

- **In-Browser Scanner:** Mobile-optimized QR scanner for hotels to verify members instantly.
- **Scan Logs:** Historical data of all entries per hotel for auditing and reporting.
- **Instant Verification:** Real-time check against the database to prevent fraud or expired cards.

5. FUTURE-READY INFRASTRUCTURE

- **Vite + React 19:** Modern tech stack for blazing fast performance and SEO optimization.
- **Framer Motion:** Smooth, physics-based transitions throughout the application.
- **Scalable Database Ready:** Structure prepared for high-traffic member onboardings.
